

## Editorial

I became the managing editor of *Annales Universitatis Paedagogicae Cracoviensis Studia Mathematica* in 2021. It is great privilege and a gloriou obligation to take over the Managing Editor post.

As an author, I know how important are fast and helpful reports from the referees. As an editor I will try my best that reports can be quick and useful.

As an author, I try to seek and discover interesting and trick manners for proving theorems. As an editor, I will try to chose these manuscripts which contain trick and amazing proofs of theorems. Any applications of mathematics may be welcome. However, I stress here, that I admire and expect proofs and theirs mathematical theoretical aspects. Therefore, I will expect clever proofs which need and use dizzy mathematical tools. Moreover, new proof of old theorem will be welcome.

I want to thank my colleagues and collaborators. I owe a lot of Beata Gryszka who serves as the Editorial Secretary and Paweł Solarz who serves as the Technical Editor. Many thanks run to Justyna Szpond, Karol Gryszka and Paweł Pasteczka for constant support in workig our journal and for their crucial hints.

Kraków, 2022
